State General Fund

County General Fund

Addictions Treatment System // Background

Does treatment achieve its goals?

- Reentry Enhancement Coordination program (2011)- 27% reduction in criminal recidivism compared to a similar group of offenders. Each dollar invested saved \$6.73 in criminal justice and victimization costs.
- STOP Court (2007)- saved \$79 million over a 10 year period compared to “business as usual”.
- CCC Mentor and Housing Programs (2008)- average participant had 589 days clean and sober at follow up, only one of 87 was actively using.

Addictions Treatment System // Background

Addiction a chronic condition often requiring lifelong management

Treatment Compliance Rates

- Diabetes = <50%
- Hypertension = <30%
- Asthma = <30%
- Addiction = 30-50%

Relapse Rates

- Diabetes = 30-50%
- Hypertension = 50-60%
- Asthma = 60-80%
- Addiction = 40-70%

Quest

Addictions Treatment System // Current State

Current System

Addictions Treatment System // What is Changing

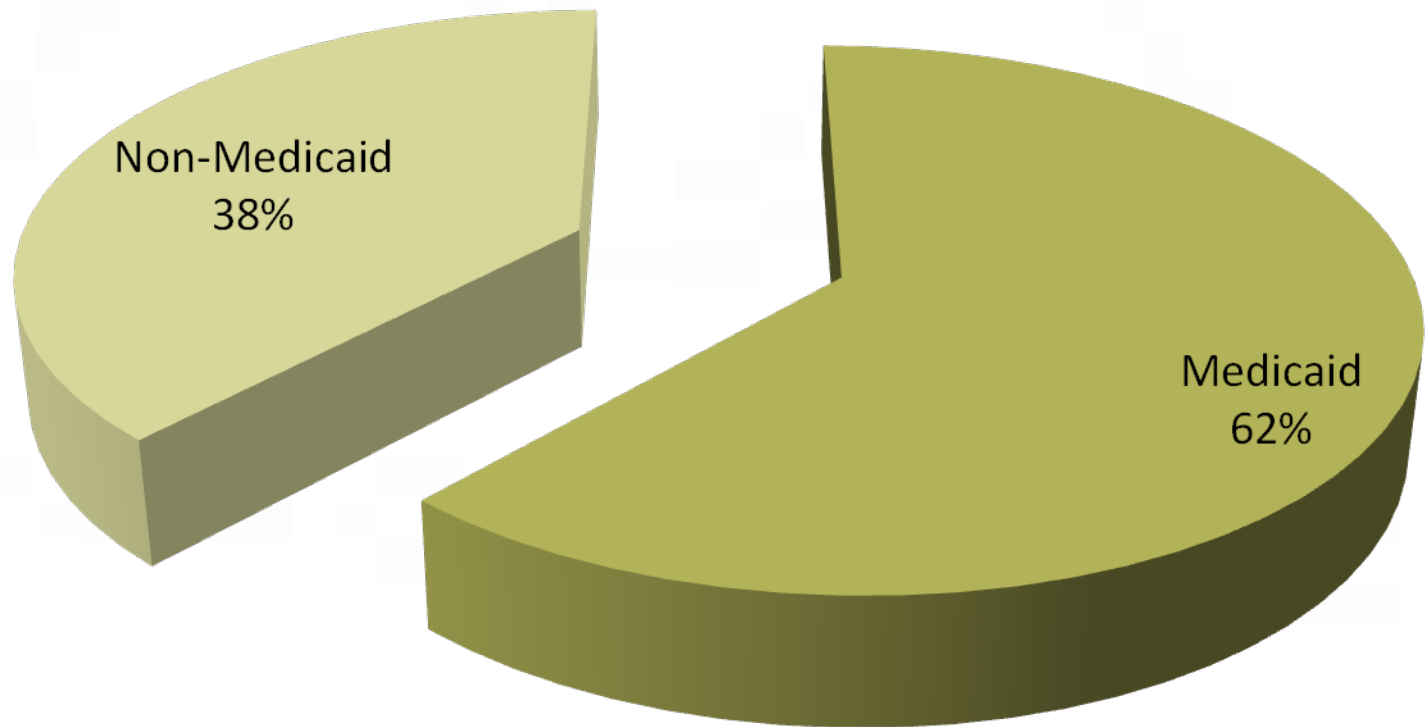

The Affordable Care Act:

- Medicaid expansion means more of our clients will have insurance coverage
- Mental Health and Addictions treatment included in the 10 essential health benefits
- Health insurance likely to cover only shorter stays in residential treatment
- Treatment for many criminal risk factors will not be covered

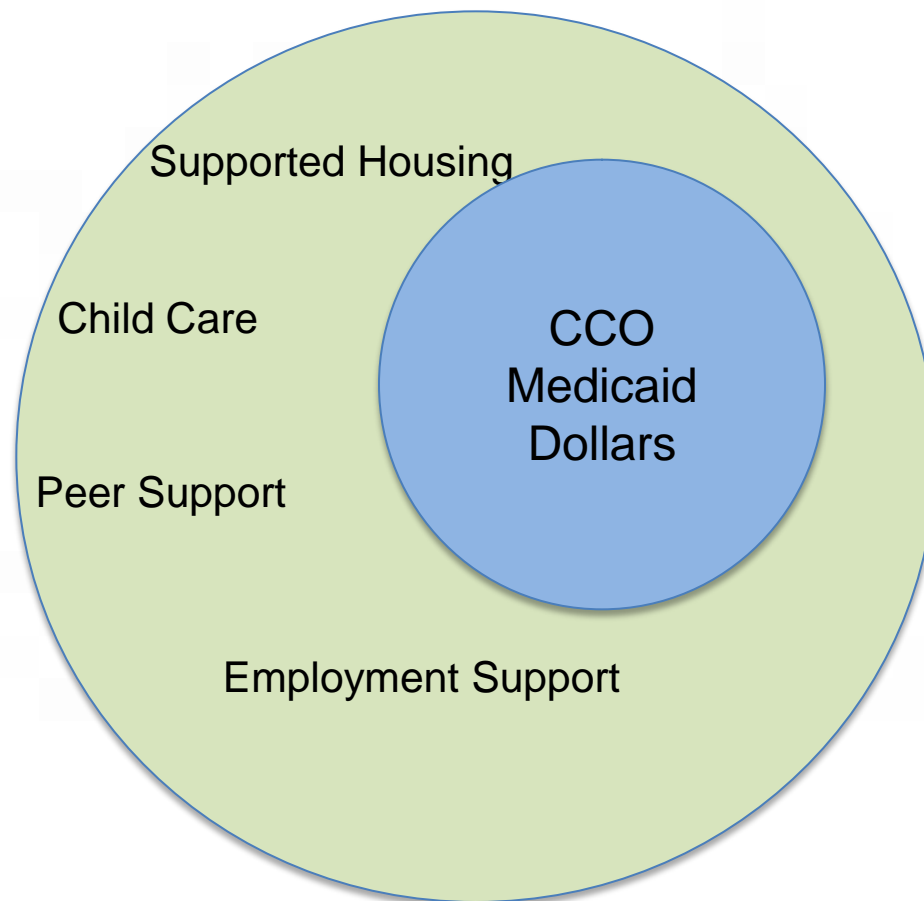

Changing Addictions Treatment System // What is Changing

Post Medicaid Expansion

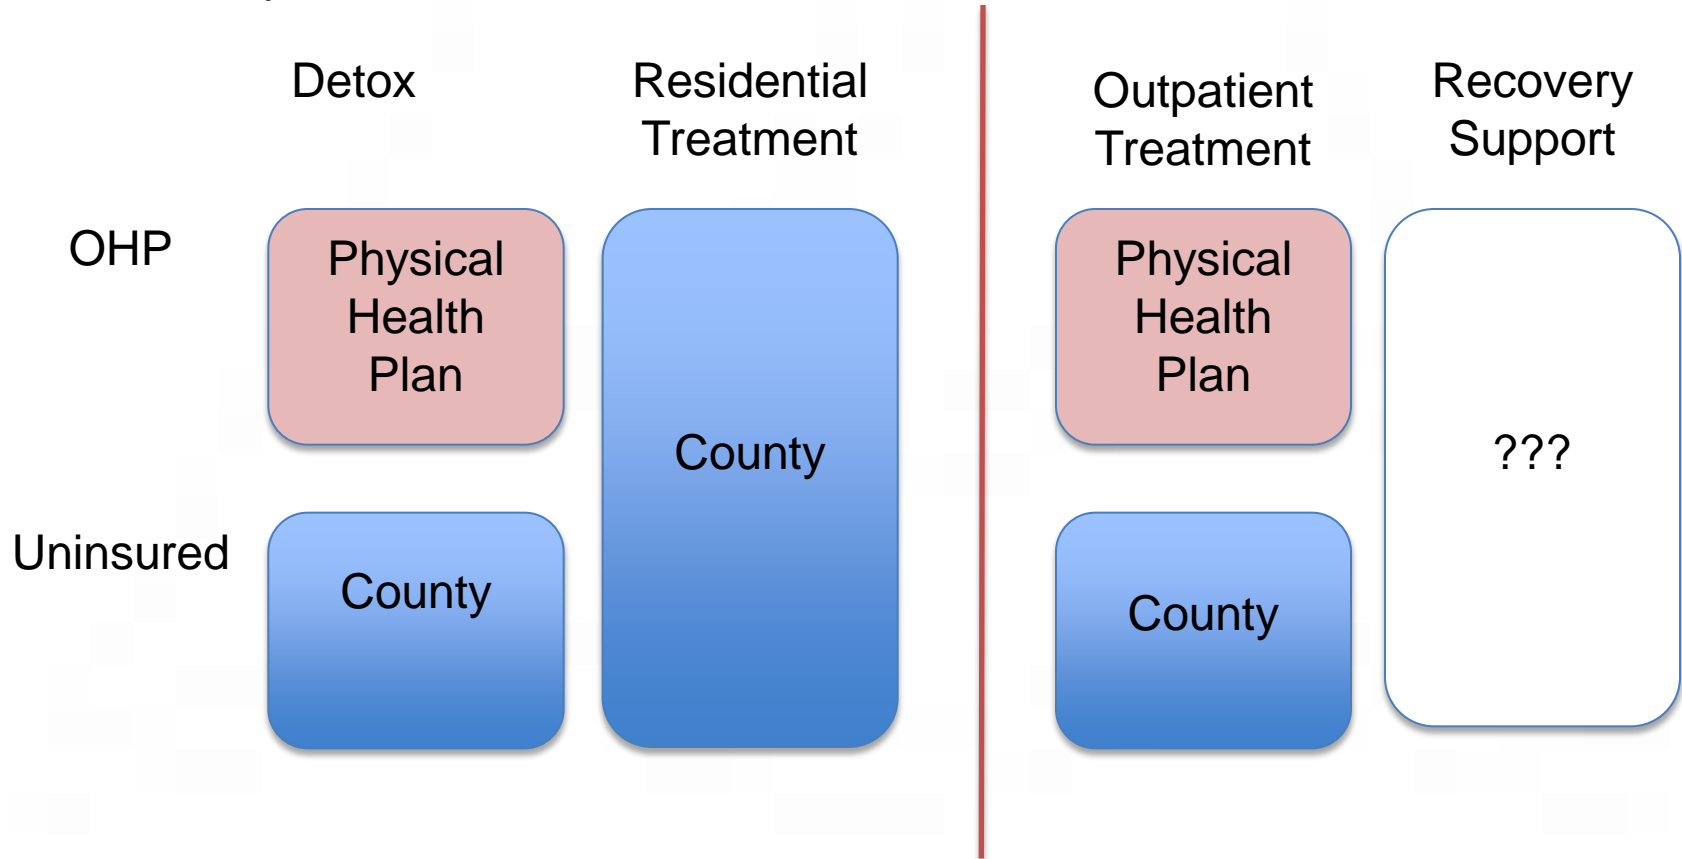

Changing Addictions Treatment System // What is Changing

Many supports that our clients need to be successful won't be paid for by Medicaid:

Changing Addictions Treatment System // Desired Future State

Future of Addictions Treatment System

- Comprehensive continuum of care
- Clean and sober housing capacity
- Recovery supports such as child care, job assistance, transportation, peer mentoring
- Treatment for criminality integrated with addictions treatment

Changing Addictions Treatment System // Thank you for your continued support
