Women of Color at Work: Elected Officials

Exploring the unique experiences of women of color occupying public office.

This is the second of four forums inspired by the **#BlackWomenAtWork** hashtag that emerged in response to comments made to Congresswoman Maxine Waters and reporter April Ryan. The hashtag inspired women of color to share their stories about what it is like to work in America as a woman of color.

Join us in this ongoing conversation about what women of color experience in the workplace and how you can be an ally.

Community Listening Session on Mental Health

Hosted by Multnomah County Commissioner Sharon Meieran

Accessible and effective mental health care is one of the most important needs facing Multnomah County. In order to address what often may seem like a fragmented system of care, Multnomah County and Human Services Research Institute (HSRI) are conducting a study of the local mental health system.

As part of the study, we are meeting with members of the community to learn about your experiences regarding current resources and needs, and hear your thoughts on what a better mental health system could look like. The goal is to help the County and the HSRI team understand how the system is actually working in Multnomah County so as to identify opportunities for meaningful change.

Food will be provided. Childcare and translation services are available by request.

Let us know if you'll need childcare, translation services or any other accommodations when you RSVP so that we may plan accordingly.
