General Information

1. What action are you requesting from the Board?

Adoption of Resolution

2. Please provide sufficient background information for the Board and the public to understand this issue. Please note which Program Offer this action affects and how it impacts the results.

In 1996, Multnomah County's Board of Commissioners and public safety officials obtained voter approval of a \$7.5 million bond to improve information technology among the county's law enforcement and justice agencies. This bond money was used to fund the development of DSS-J, a common data warehouse that would integrate public safety data from local sources.

In its FY 2010 adopted budget, Multnomah County's Board of Commissioners formally transferred responsibility for the administration of DSS-J to the County's Local Public Safety Coordinating Council (LPSCC), which agreed to oversee the development of DSS-J through a Policy Committee and ensure data security through a Security Committee. This Policy Committee, recognizing the tremendous benefit already demonstrated by this data

warehouse, also determined that an action plan was needed to identify strategies that would improve the administration and operation of DSS-J and ensure the realization of the system's full potential. One of those strategies is to improve accessibility of DSS-J's tools. With the inclusion of Gresham's data, analysts, program managers and policy makers will have access to more reliable and complete public safety data.

3. Explain the fiscal impact (current year and ongoing).

None

4. Explain any legal and/or policy issues involved.

Approval of this resolution approves the IGA between Multnomah County and Gresham

5. Explain any citizen and/or other government participation that has or will take place.

Multnomah County jurisdictions continue to collaborate via the Local Public Safety Coordinating Council and improve public safety systems through partnership and collaboration.
