50-Year Preclusion on the land

ORS 195.145(4):

Urban reserves designated by a metropolitan service district and a county pursuant to subsection (1)(b) of this section must be planned to accommodate population and employment growth for at least 20 years, and not more than 30 years, after the 20-year period for which the district has demonstrated a buildable land supply in the most recent inventory, determination and analysis performed under ORS 197.296.

OAR 660-027-0040

(2) Urban reserves designated under this division shall be planned to accommodate estimated urban population and employment growth in the Metro area for at least 20 years, and not more than 30 years, beyond the 20-year period for which Metro has demonstrated a buildable land supply inside the UGB in the most recent inventory, determination and analysis performed under ORS 197.296. Metro shall specify the particular number of years for which the urban reserves are intended to provide a supply of land, based on the estimated land supply necessary for urban population and employment growth in the Metro area for that number of years. The 20 to 30-year supply of land specified in this rule shall consist of the combined total supply provided by all lands designated for urban reserves in all counties that have executed an intergovernmental agreement with Metro in accordance with OAR 660-027-0030.

(4) Neither Metro nor a local government may amend a UGB to include land designated as rural reserves during the period described in section (2) or (3) of this rule, whichever is applicable.

(5) Metro shall not re-designate rural reserves as urban reserves, and a county shall not re-designate land in rural reserves to another use, except as provided in OAR 660-027-0070, during the period described in section (2) or (3) of this rule, whichever is applicable.

Natural Landscape Features

ORS 195.137(1):

“Rural reserve” means land reserved to provide long-term protection for agriculture, forestry or important natural landscape features that limit urban development or help define appropriate natural boundaries of urbanization, including plant, fish and wildlife habitat, steep slopes and floodplains.
