SIERRA CLUB

OREGON CHAPTER

June 1, 2017

Chair Deborah Kafoury
Commissioner Sharon Meieran
Commissioner Loretta Smith
Commissioner Jessica Vega Pederson
Commissioner Lori Stegman

Re: Testimony on Resolution No. 2015-076

My name is Dr. Gregory Monahan and I am submitting this testimony on behalf of the Sierra Club.

The Sierra Club very much appreciates the Board of Commissioners for Multnomah County's leadership and vision in creating this forward thinking and ground breaking 100% Renewable Energy Resolution. Local action like this and the similar resolution from the City of Portland are especially critical when our country's leadership in Washington is determined to reverse any forward progress on mitigating the worst impacts of climate change.

In considering any amendments to this resolution the Sierra Club asks that you stay grounded in the central tenet behind the resolution: The residents of Multnomah County deserve a 100% Renewable Energy future that will be free from fossil fuels as well as other greenhouse gas emitting energy sources such as industrial scale biomass from public lands.

We understand that you may have been or still may be under considerable pressure from the utilities and industry to weaken the resolution as they are concerned about negative impacts on their bottom line. Our country's laws require publicly traded corporations to act in the interests of their shareholders to maximize their profits. However, elected leaders such as your selves have a different mandate: to ensure a future in which all of the residents of the County can thrive. This mandate can only be achieved if you stand strong in support of amendments that strengthen the resolution and against efforts to weaken the resolution.

Future generations will applaud your leadership and vision.

Comments to the Multnomah County Commission on Resolution to Meet Community-Wide Energy Needs in Multnomah County with 100 percent Renewable Energy by 2050

Good Morning Chair Kafoury and Commissioners:

I am Dr. Theodora Tsongas, an environmental health scientist/epidemiologist, with 40 years' public health experience with Federal and State agencies as well as teaching appointments at the University of Colorado, Washington State University, and Portland State University. I am a member of the Climate Change and Health Topic Committee of the American Public Health Association.

I want to commend you on a very thoughtful and comprehensive renewable energy resolution, that will contribute greatly to achieving Multnomah County's share of the responsibility for responding to climate change. We must do all we can as a county and as a community to respond to this crisis. Thank you for this excellent resolution.

I have a major concern, however, and that is the necessity to understand that use of biomass as a source of energy is not a way to address climate change, in fact, it is counterproductive. Biomass energy produces more carbon dioxide, methane and nitrogen dioxide than most fossil fuels per unit of energy created. And its implementation as an energy source will result in degradation of the carbon sequestration capacity of our forests, when increasing forest sequestration is essential to controlling and reducing atmospheric CO2 levels. The County must actively safeguard vital, living, forest ecosystems that generate clean drinking water, stabilize regional climates, and store carbon.

Furthermore, the language in the resolution excluding "biomass that degrades human and ecological health" can be interpreted in many ways to fit one's own agenda. How does one minimize the impacts to human and ecological health by replacing one carbon intensive fuel with another? The goal of addressing climate change becomes impossible to achieve. Therefore, I hope you will reconsider and exclude all biomass from the definition of renewable energy resources.

Thank you for the opportunity to suggest changes to this well considered resolution.

Theodora Tsongas, PhD, MS
Portland, OR 97215
