- Procedure development for all administrative support staff.
- Cross-training to enhance workload balancing.

MAJOR CHANGES FROM LAST YEAR

- One Office Assistant 2 position was transferred to the County Counsel Division.
- One Office Assistant 2 position was transferred to the Finance Division.

PURPOSE STATEMENT

It is the purpose of the Information Services Division to provide the expertise and to maintain the facilities for productive and effective use of data processing systems in support of the delivery of services by Multnomah County. This is done through planning and consulting services, systems development services, equipment and facilities management and centralized computer services. To allow the most effective and greatest variety of data processing services at the lowest cost, DPA provides these services to other governmental agencies in the local area.

The Telecommunication Section provides a full range of telecommunications systems and services County-wide to ensure an efficient system configuration and operation.

DIVISION SUMMARY

WORK PLAN DESCRIPTION

The 1984-85 Work Plan for ISD includes two areas of emphasis: upgrading service levels and working to resolve a number of policy questions about the future of data processing in Multnomah County.

Improvements will be made in computer availability, on-line response times and scheduling of batch work. At the proposed budget level without the total package, maintenance of applications will be at minimal levels (no major enhancements). The Information Center will continue to work with users to provide data processing services, implement training programs for users, improve problem tracking and follow-up and coordinate planning with users. The Systems Replacement Program will continue with FMS replacement and will begin work on a Fixed Assets system.

Telecommunications will: review the impact of Pacific Northwest Bell's measured service rate structure, install any appropriate controls minimizing the financial impact to the County; experiment using the County's microwave network for data communications out of ISD; begin the integration of data and voice communication lines and review alternatives to the Infoswitch Toll Management System.

MAJOR CHANGES FROM LAST YEAR

ISD will:

- begin implementation of the Systems Replacement Program (SRP)
- continue efforts to improve County communication facilities for both data and voice
- undertake the responsibility of administering Telecommunications as transferred from Facilities Management
