General Information

1. What action are you requesting from the Board?

The authors and community groups that have verified and endorsed the African American report, ask for the Board to consider its policy suggestions that may be explicitly solved through Multnomah County government. This would include but not be limited to the County's ability to evolve policies that affect human services, criminal justice, and culturally specific contracting, all of which are within the County's purview; and to allocate correct funds within connected programs and departments that can see to the care of the African American Community.

2. Please provide sufficient background information for the Board and the public to understand this issue. Please note which Program Offer this action affects and how it impacts the results.

This issue is a report from a format which has been presented to the Board before, and is a part of a series of presentations from the *Unsettling Profile Series*, created by the Coalition

of Communities of Color. This report actually accounts for the experience of African Americans living in Multnomah County. The best background information can be found in the report's Executive Summary.

3. Explain the fiscal impact (current year and ongoing).

Initial fiscal impact would be to at least examine the current County budget and to list the program costs of certain programs that support African Americans, and to on an ongoing basis make public those budget calculations. At the time of submitting this APR, there is no specific request of funds, but there could be when the report is furthered discussed with all County Commissioners at the time of budget creation.

4. Explain any legal and/or policy issues involved.

Perhaps not legal, but certainly policy. The issues of concern are listed in the policy suggestions in the report.

5. Explain any citizen and/or other government participation that has or will take place.

To best address policy solutions pertaining to human and health services, it will be suggested that the County work with the Oregon Health Authority on more streamlined service delivery to African Americans, particularly for HIV/STD programs and Maternal Child Health; to best coordinate with Oregon Health Authority's Public Health Division generally.

That is just one idea that will be brought up in the time before the Board.
